- Short description of yourself

About Immaculate Conception Academy

[Visit our website for more information](#)

Immaculate Conception Academy is an independent K-12 Academy located in the heart of Norwood. The mission of the Academy is to instill in our students both faith and honor (Fides et Honor) by offering them the means and the encouragement necessary to achieve their

intellectual, moral, social, and physical development in a traditional Catholic environment. All true education must begin with the understanding that God creates every person in His Own image, with the power of intellect to know truth and the power of will to love goodness. The method of education employed at the Academy is twofold: the Classical Curriculum serving the intellectual perfection of our students and the disciplinary method of Saint John Bosco (the “preventive” system) promoting the students’ moral development.
